

# Assessment

Hadley Wickham

# Homeworks

- You're not on your own
- Collaborate more
- Ask me if you get stuck

# Project

- Learning process for all of us
- Generally, didn't do as well as I'd expected
- But since it was pretty consistent across the class, that means it's my fault
- Changes for next project

# Grading

- Was too coarse - I don't think I've given very precise feedback on what went wrong - written comments are most important
- Next time will break down more finely, but remember to **PAY ATTENTION** to the grading scheme
- Don't worry too much about the absolute number

# Length

- I want to be substantially bigger than the homework
- Practice putting together a longer document, with less guidance
- Practice working with a group
- But, shouldn't be unbearable, and it shouldn't take up too much time

# Next time

After spring break, 2 + 1

- At least one interim report and meeting with me.
- How much time do you want? 3 weeks? 4 weeks?
  - 1 + 2? 2 + 1?
  - 1 + 3? 2 + 2? 3 + 1?
- Before or after spring break?
