

# Projects

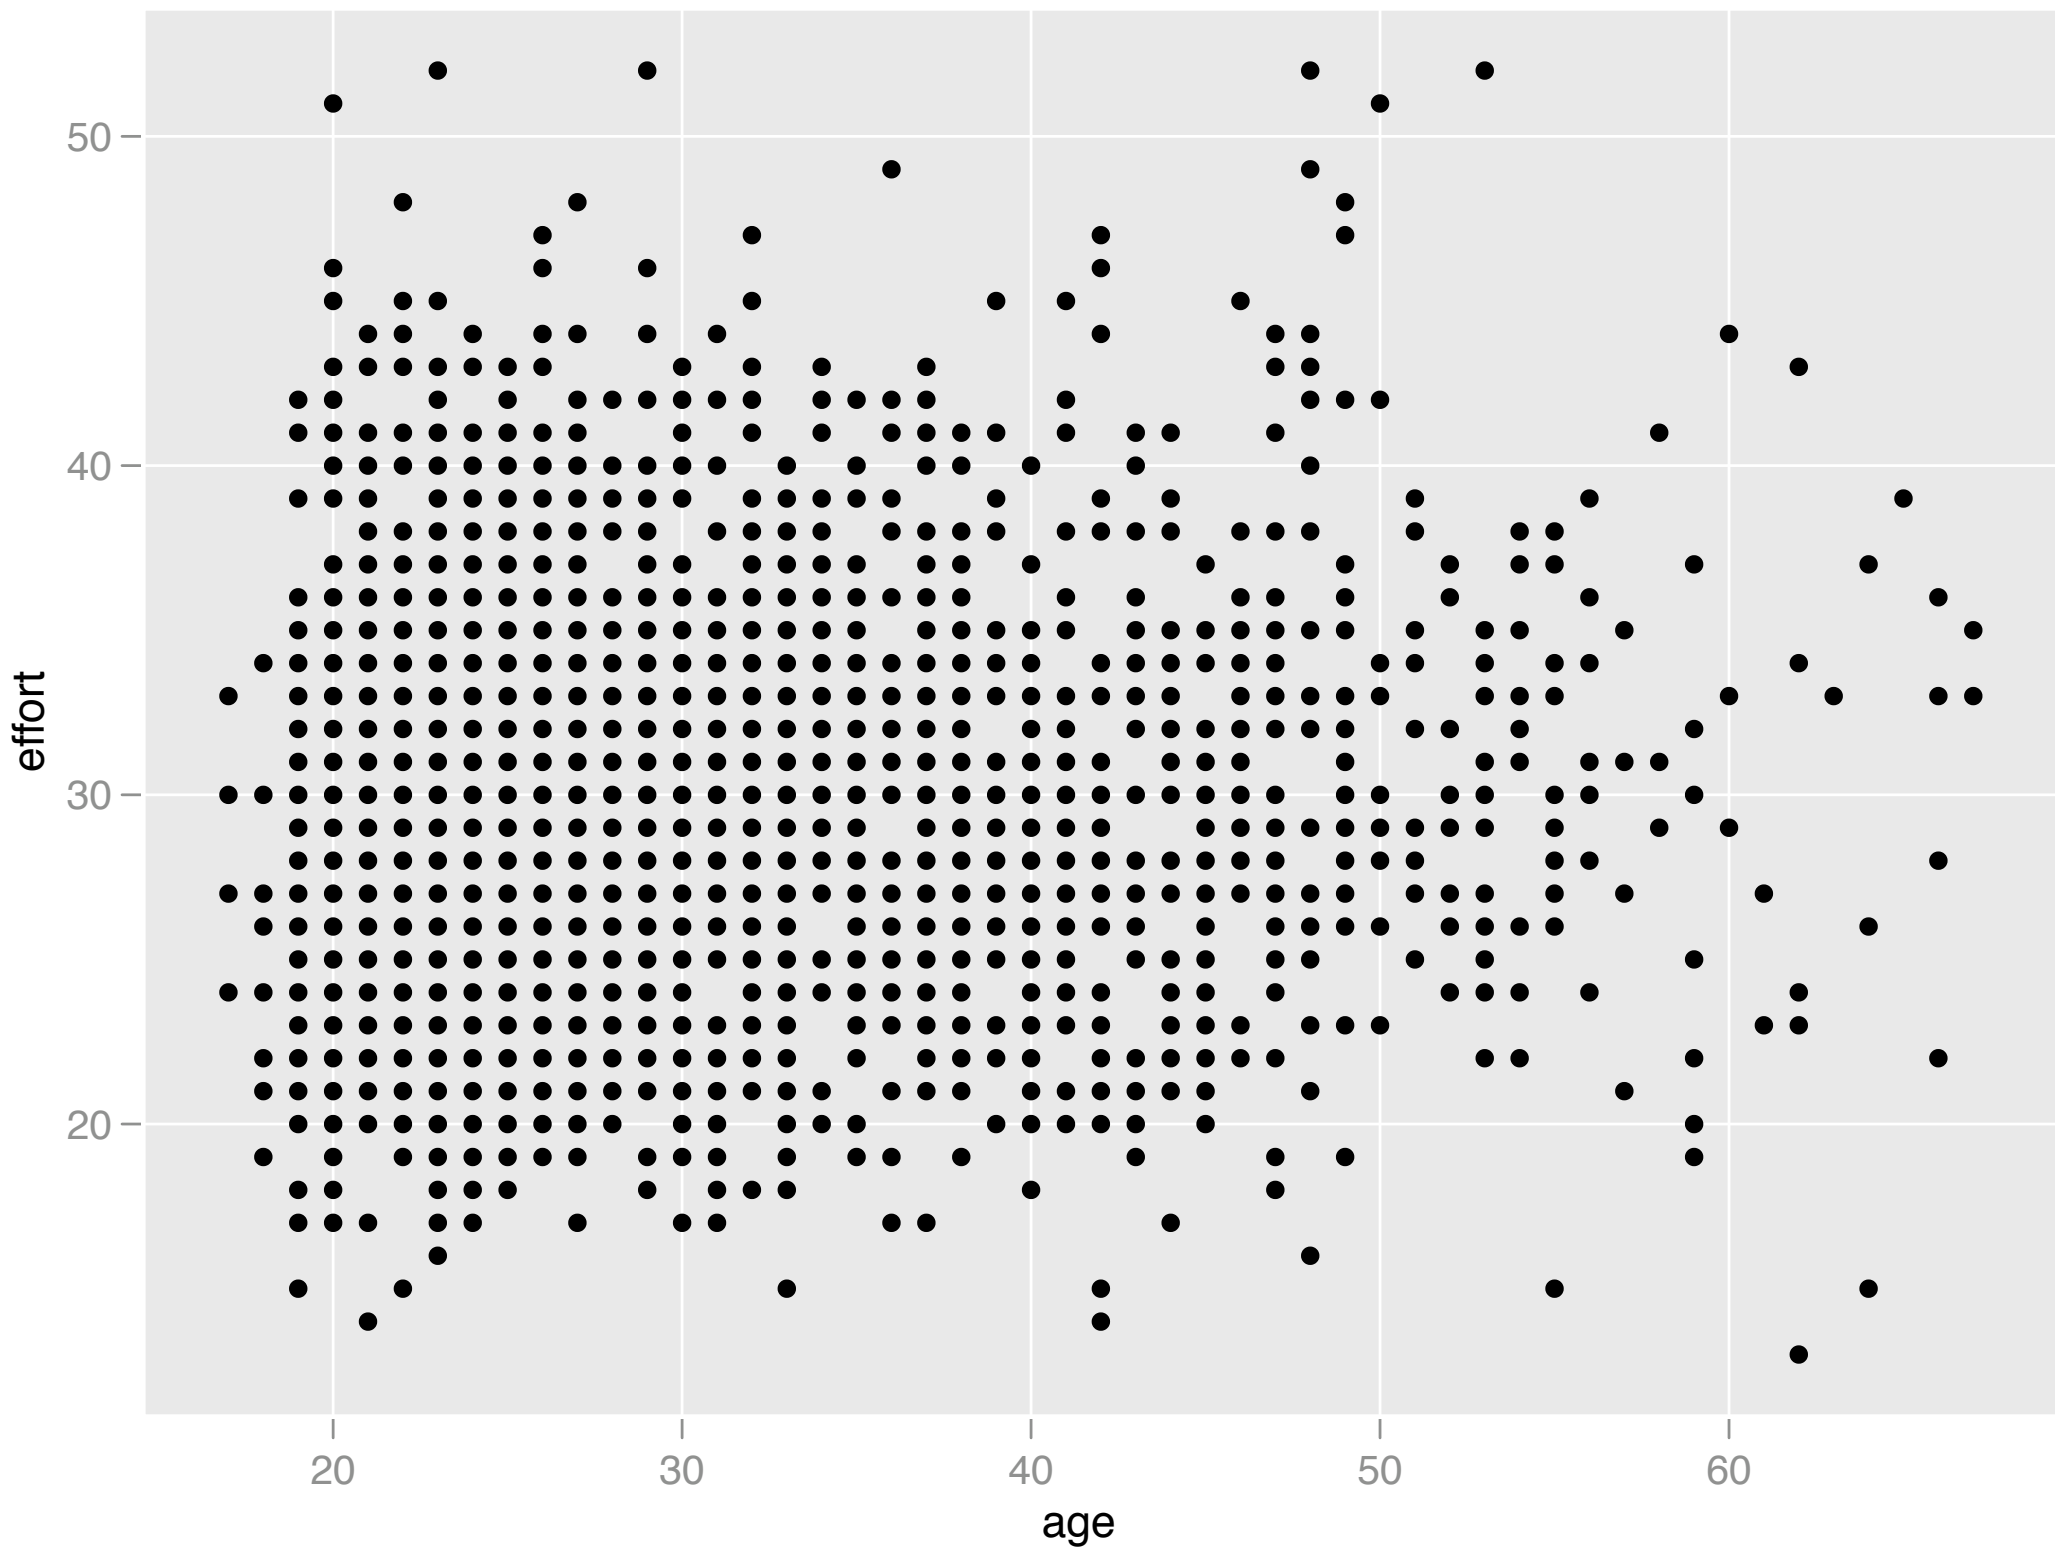

Hadley Wickham

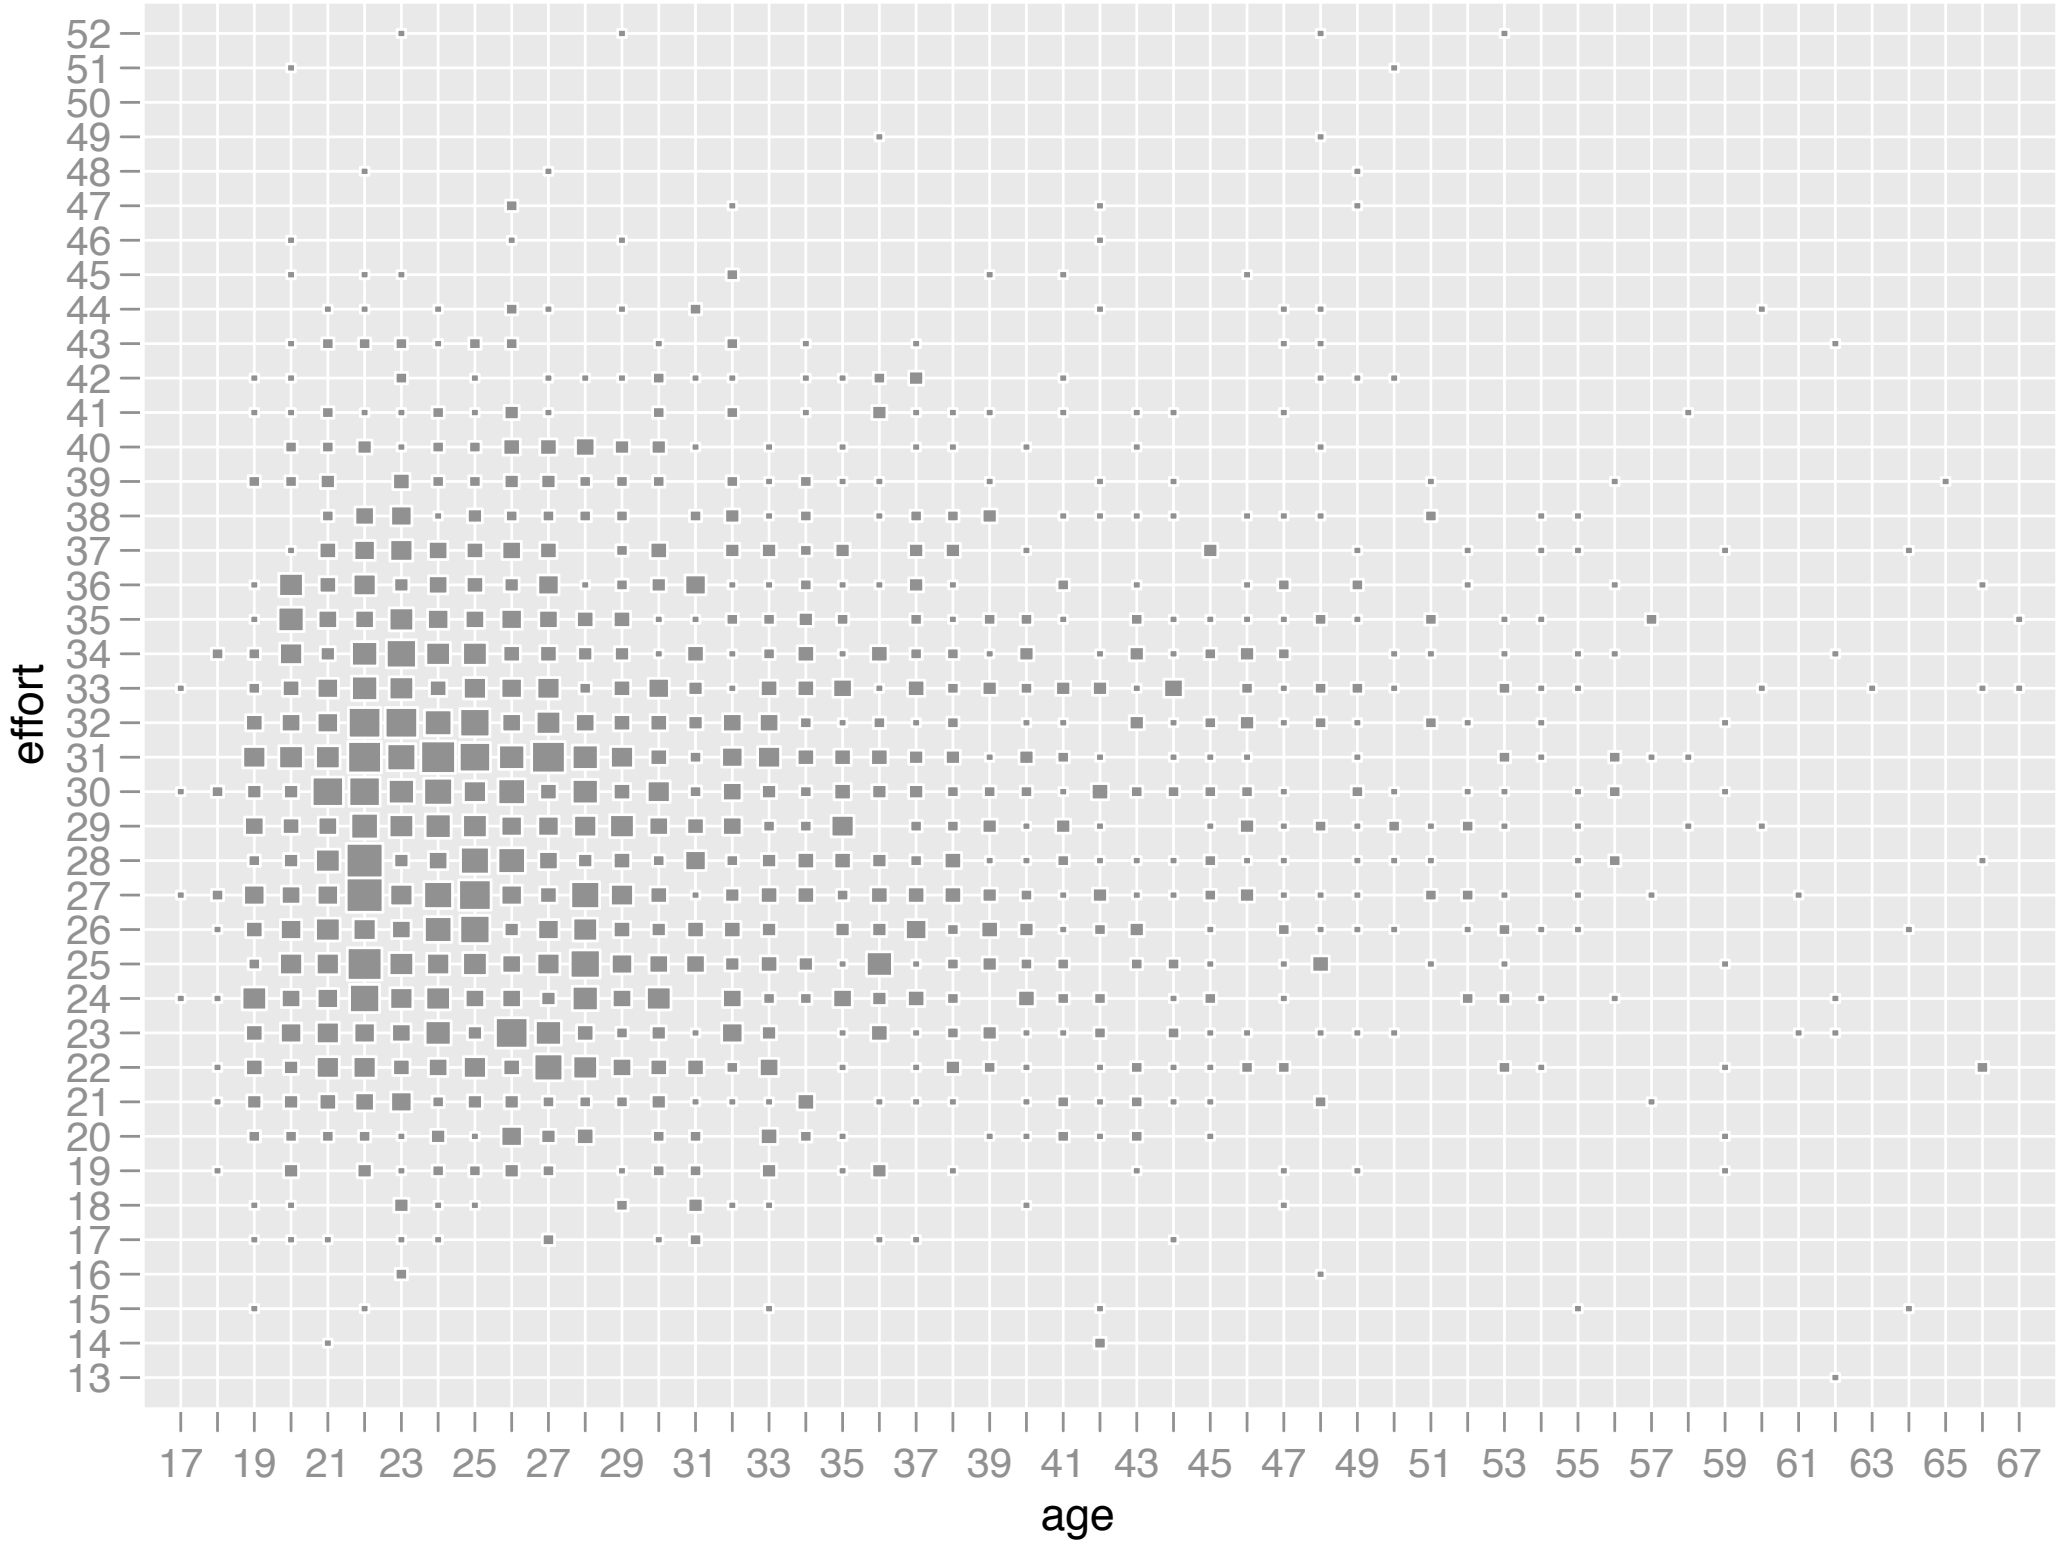

# Projects

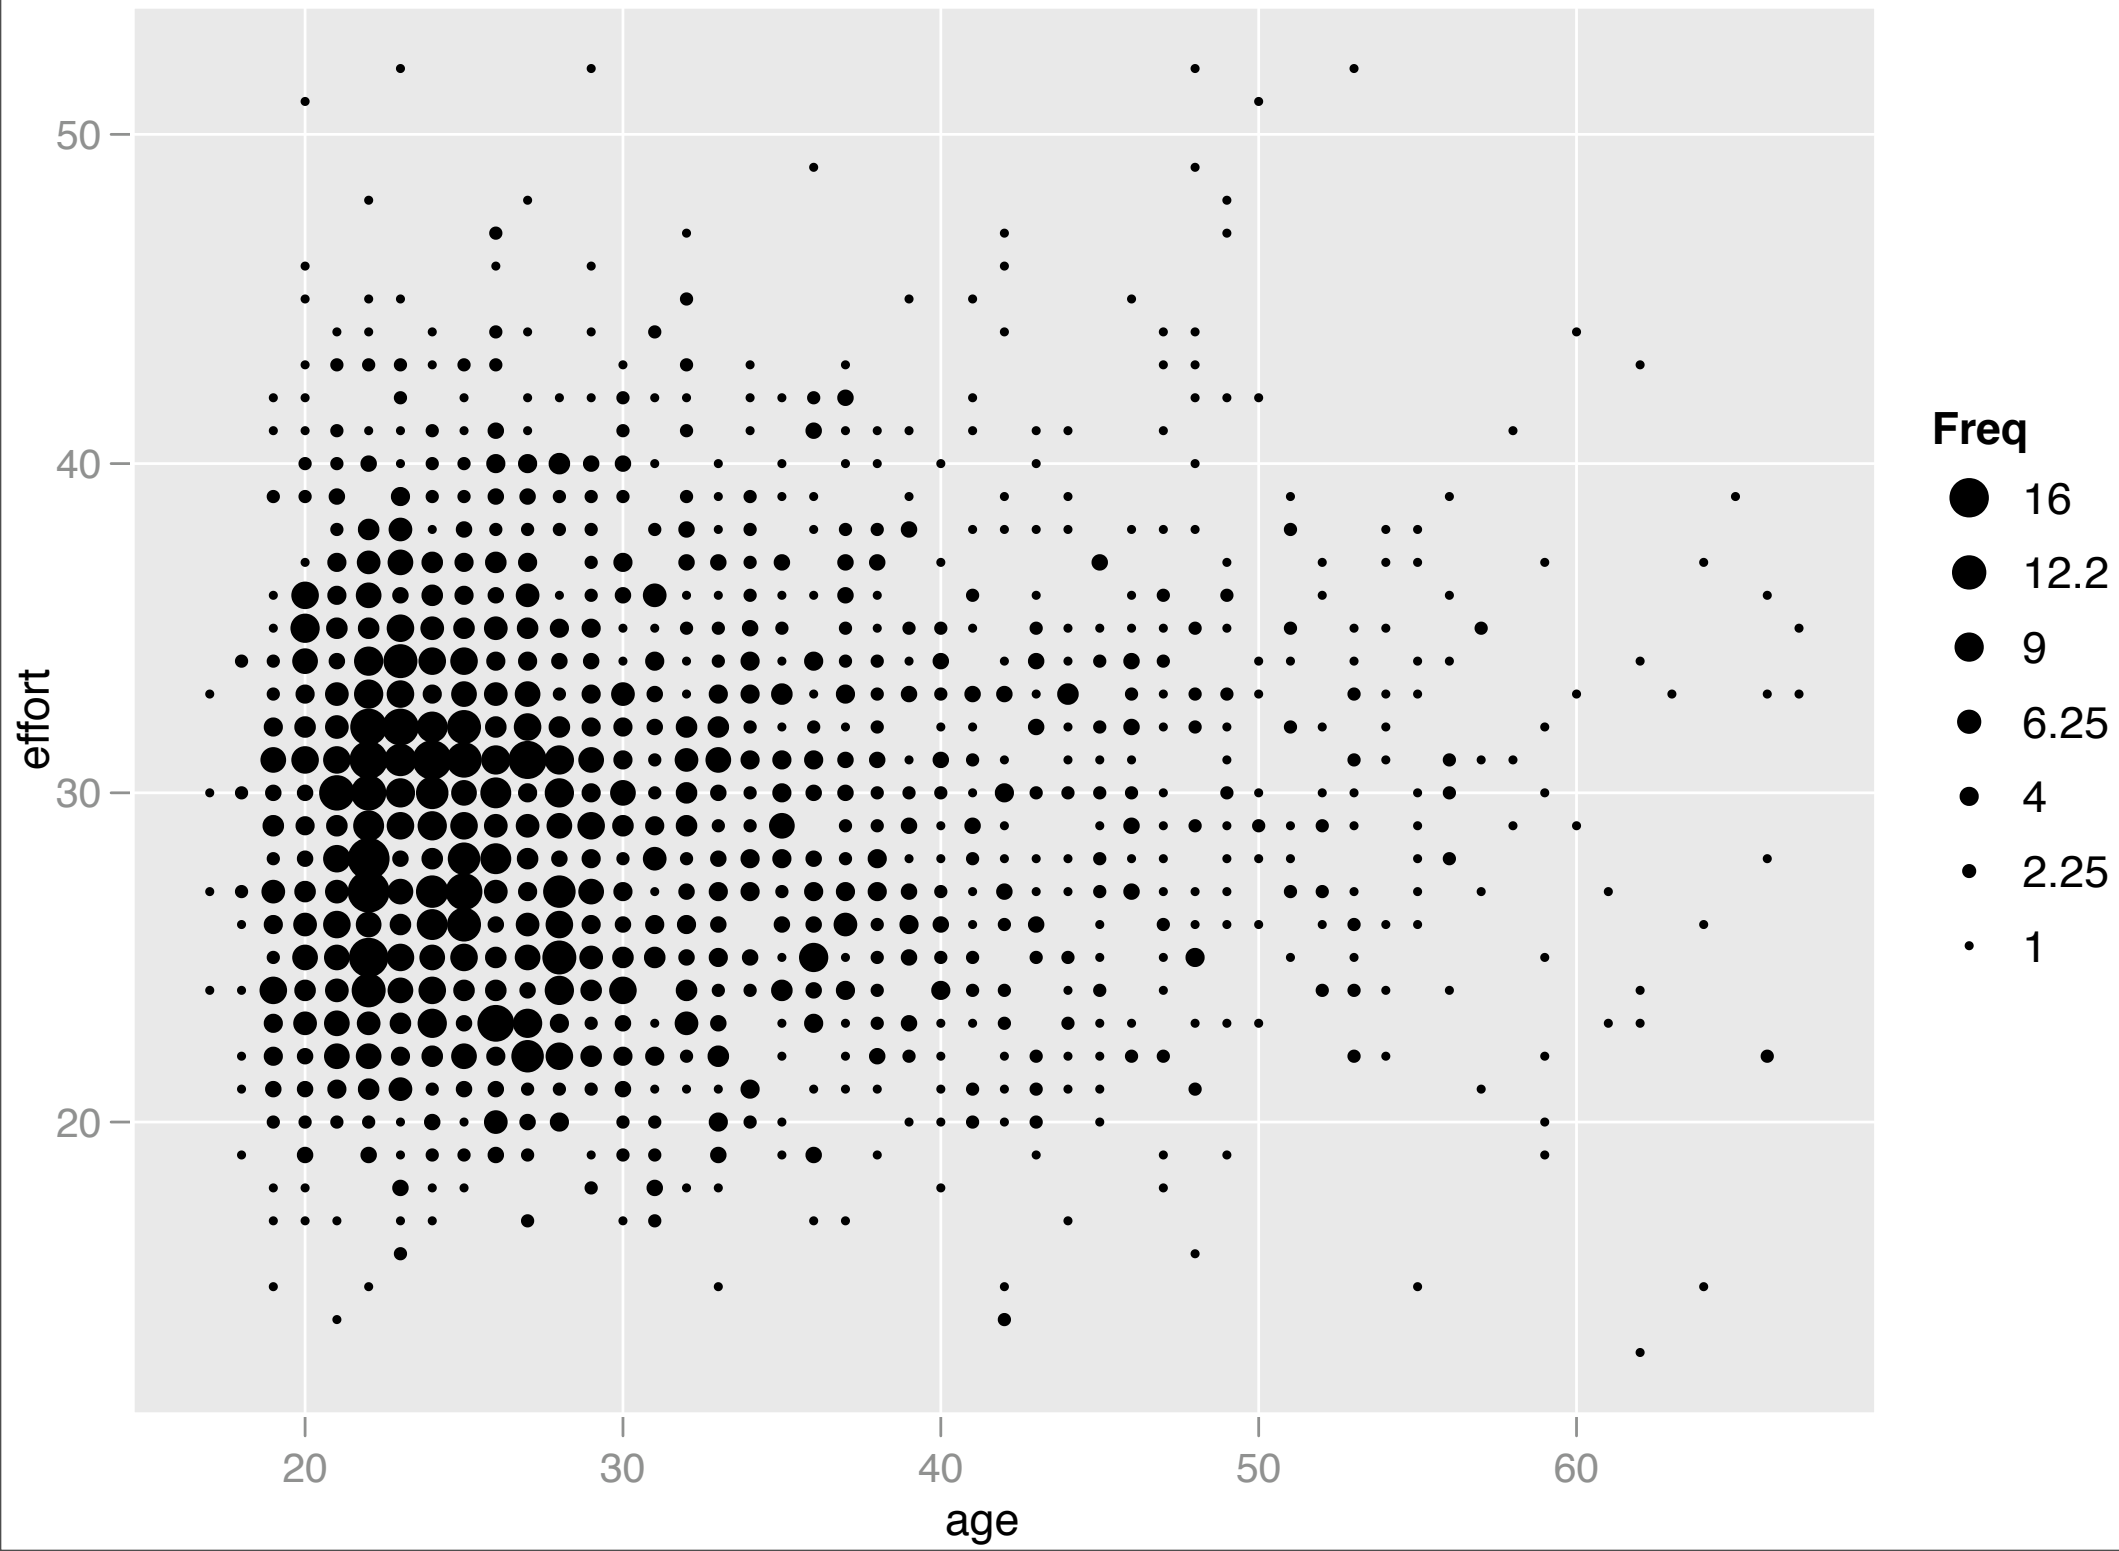

- Fantastic job!
- Everyone found some interesting things about the data
- Four particularly good reports up on the website - and have contact Dr Lynn
- Just a couple of minor points about graphics

# Overplotting

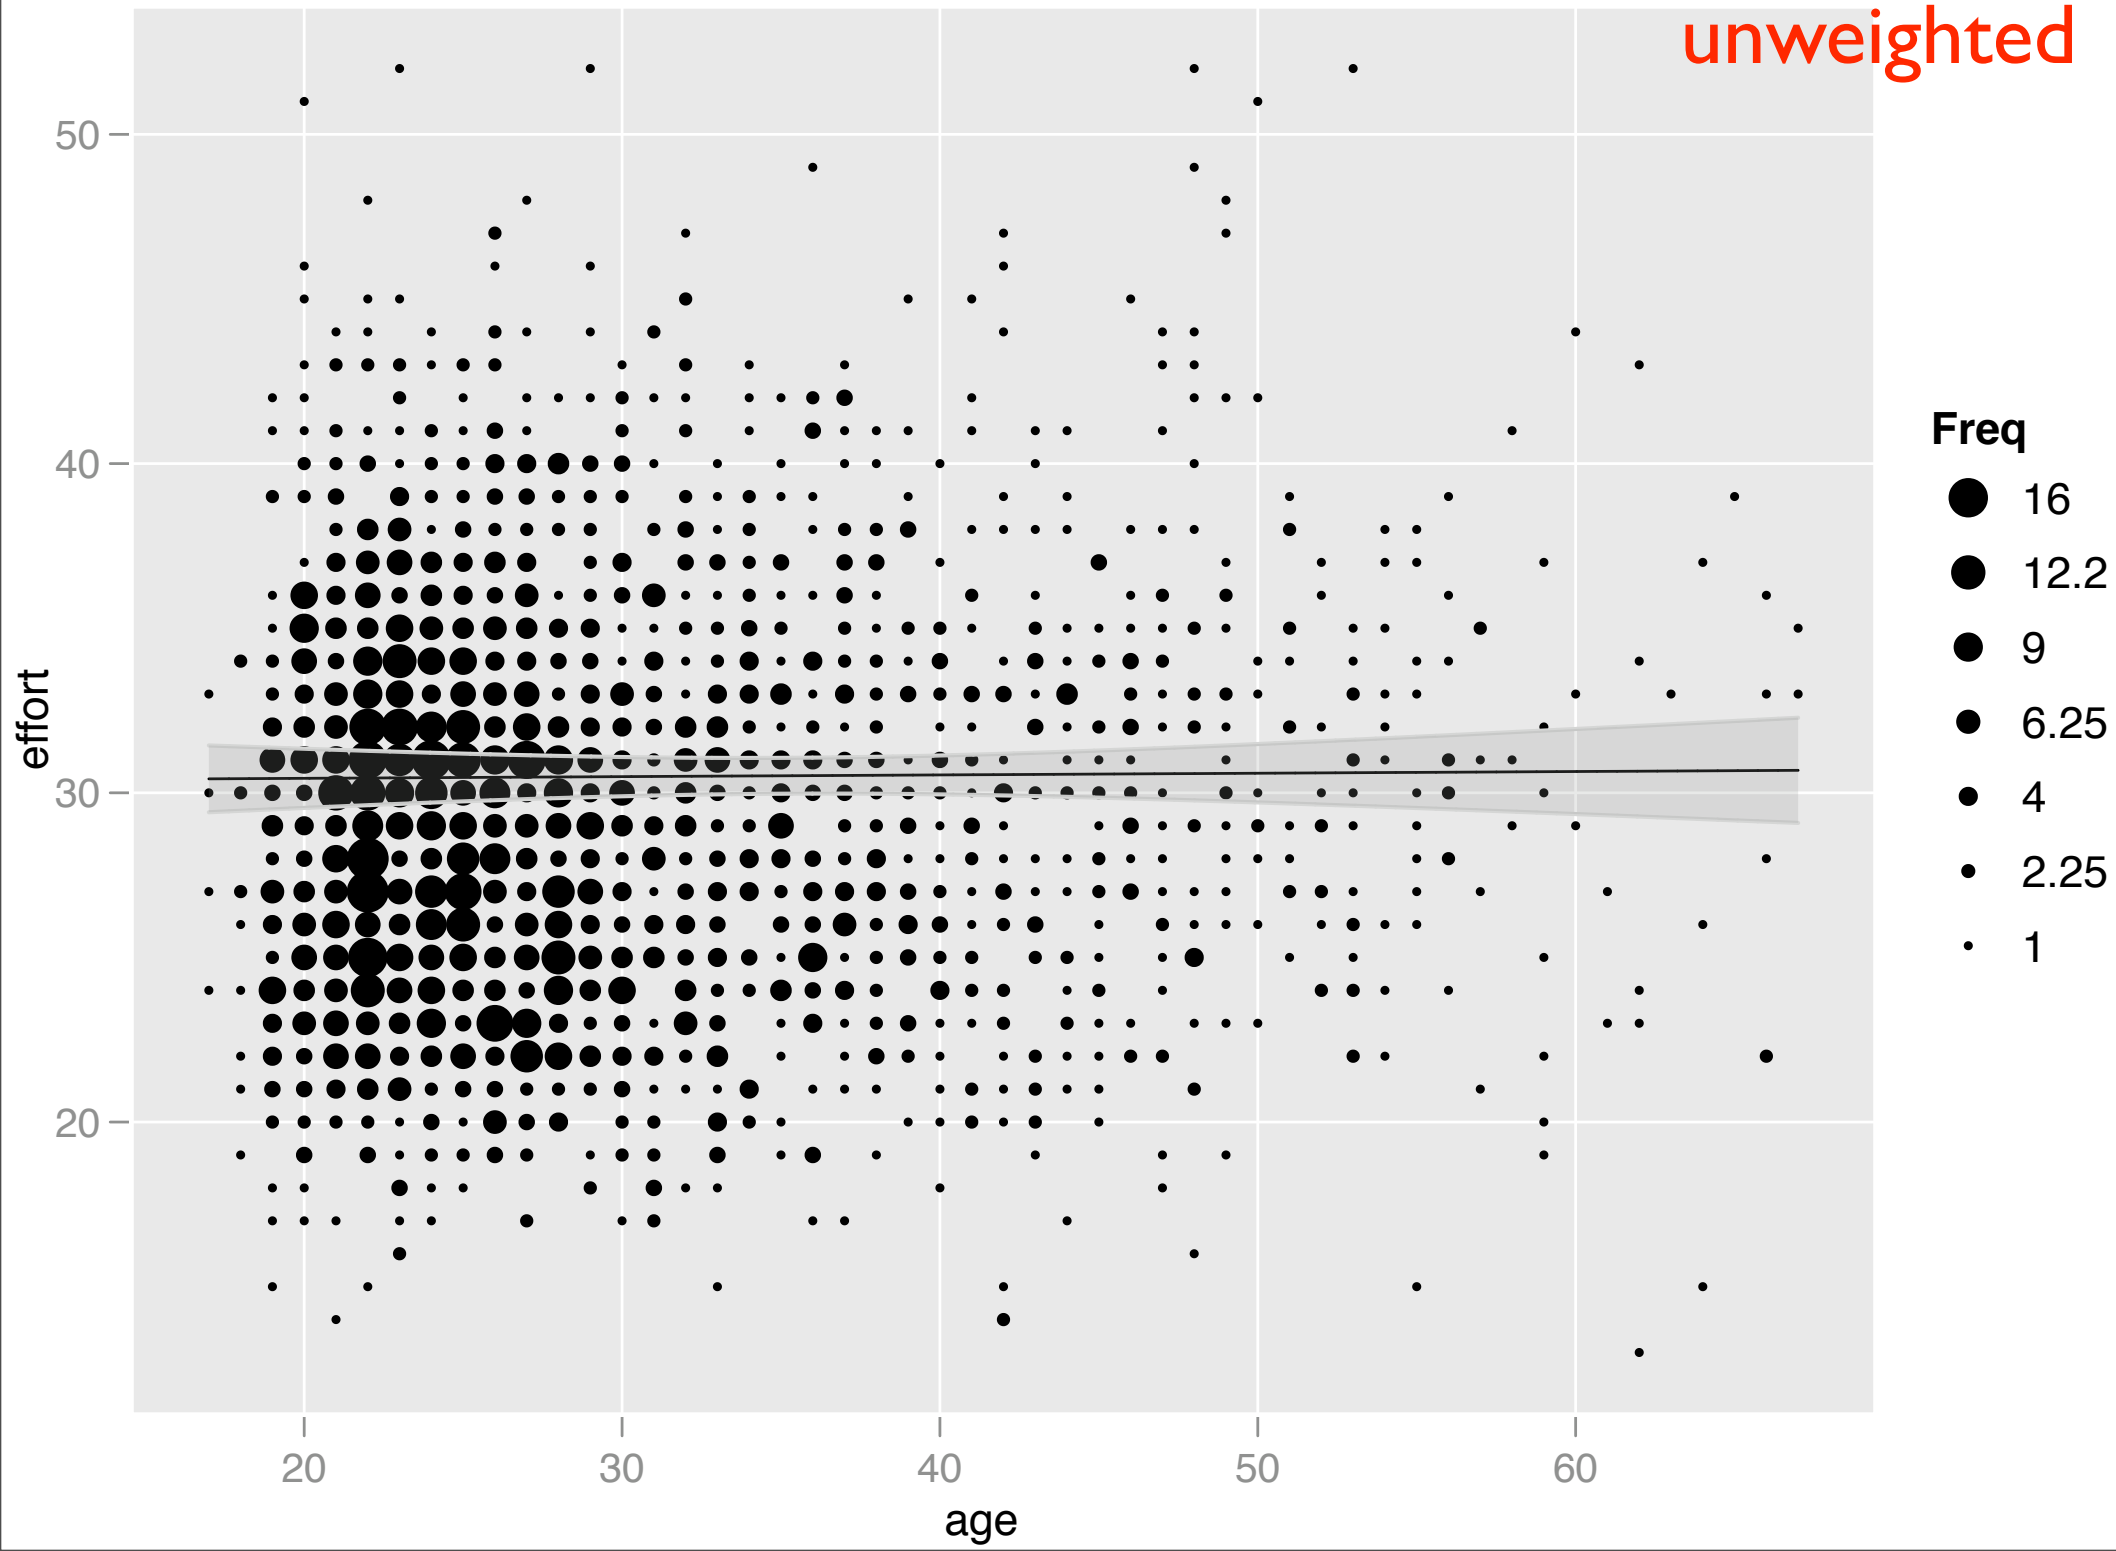

- When you have many data points plotted on few locations, just looking at the plot can be misleading
- Always add a smoother!  
(and generally, never a bad idea)

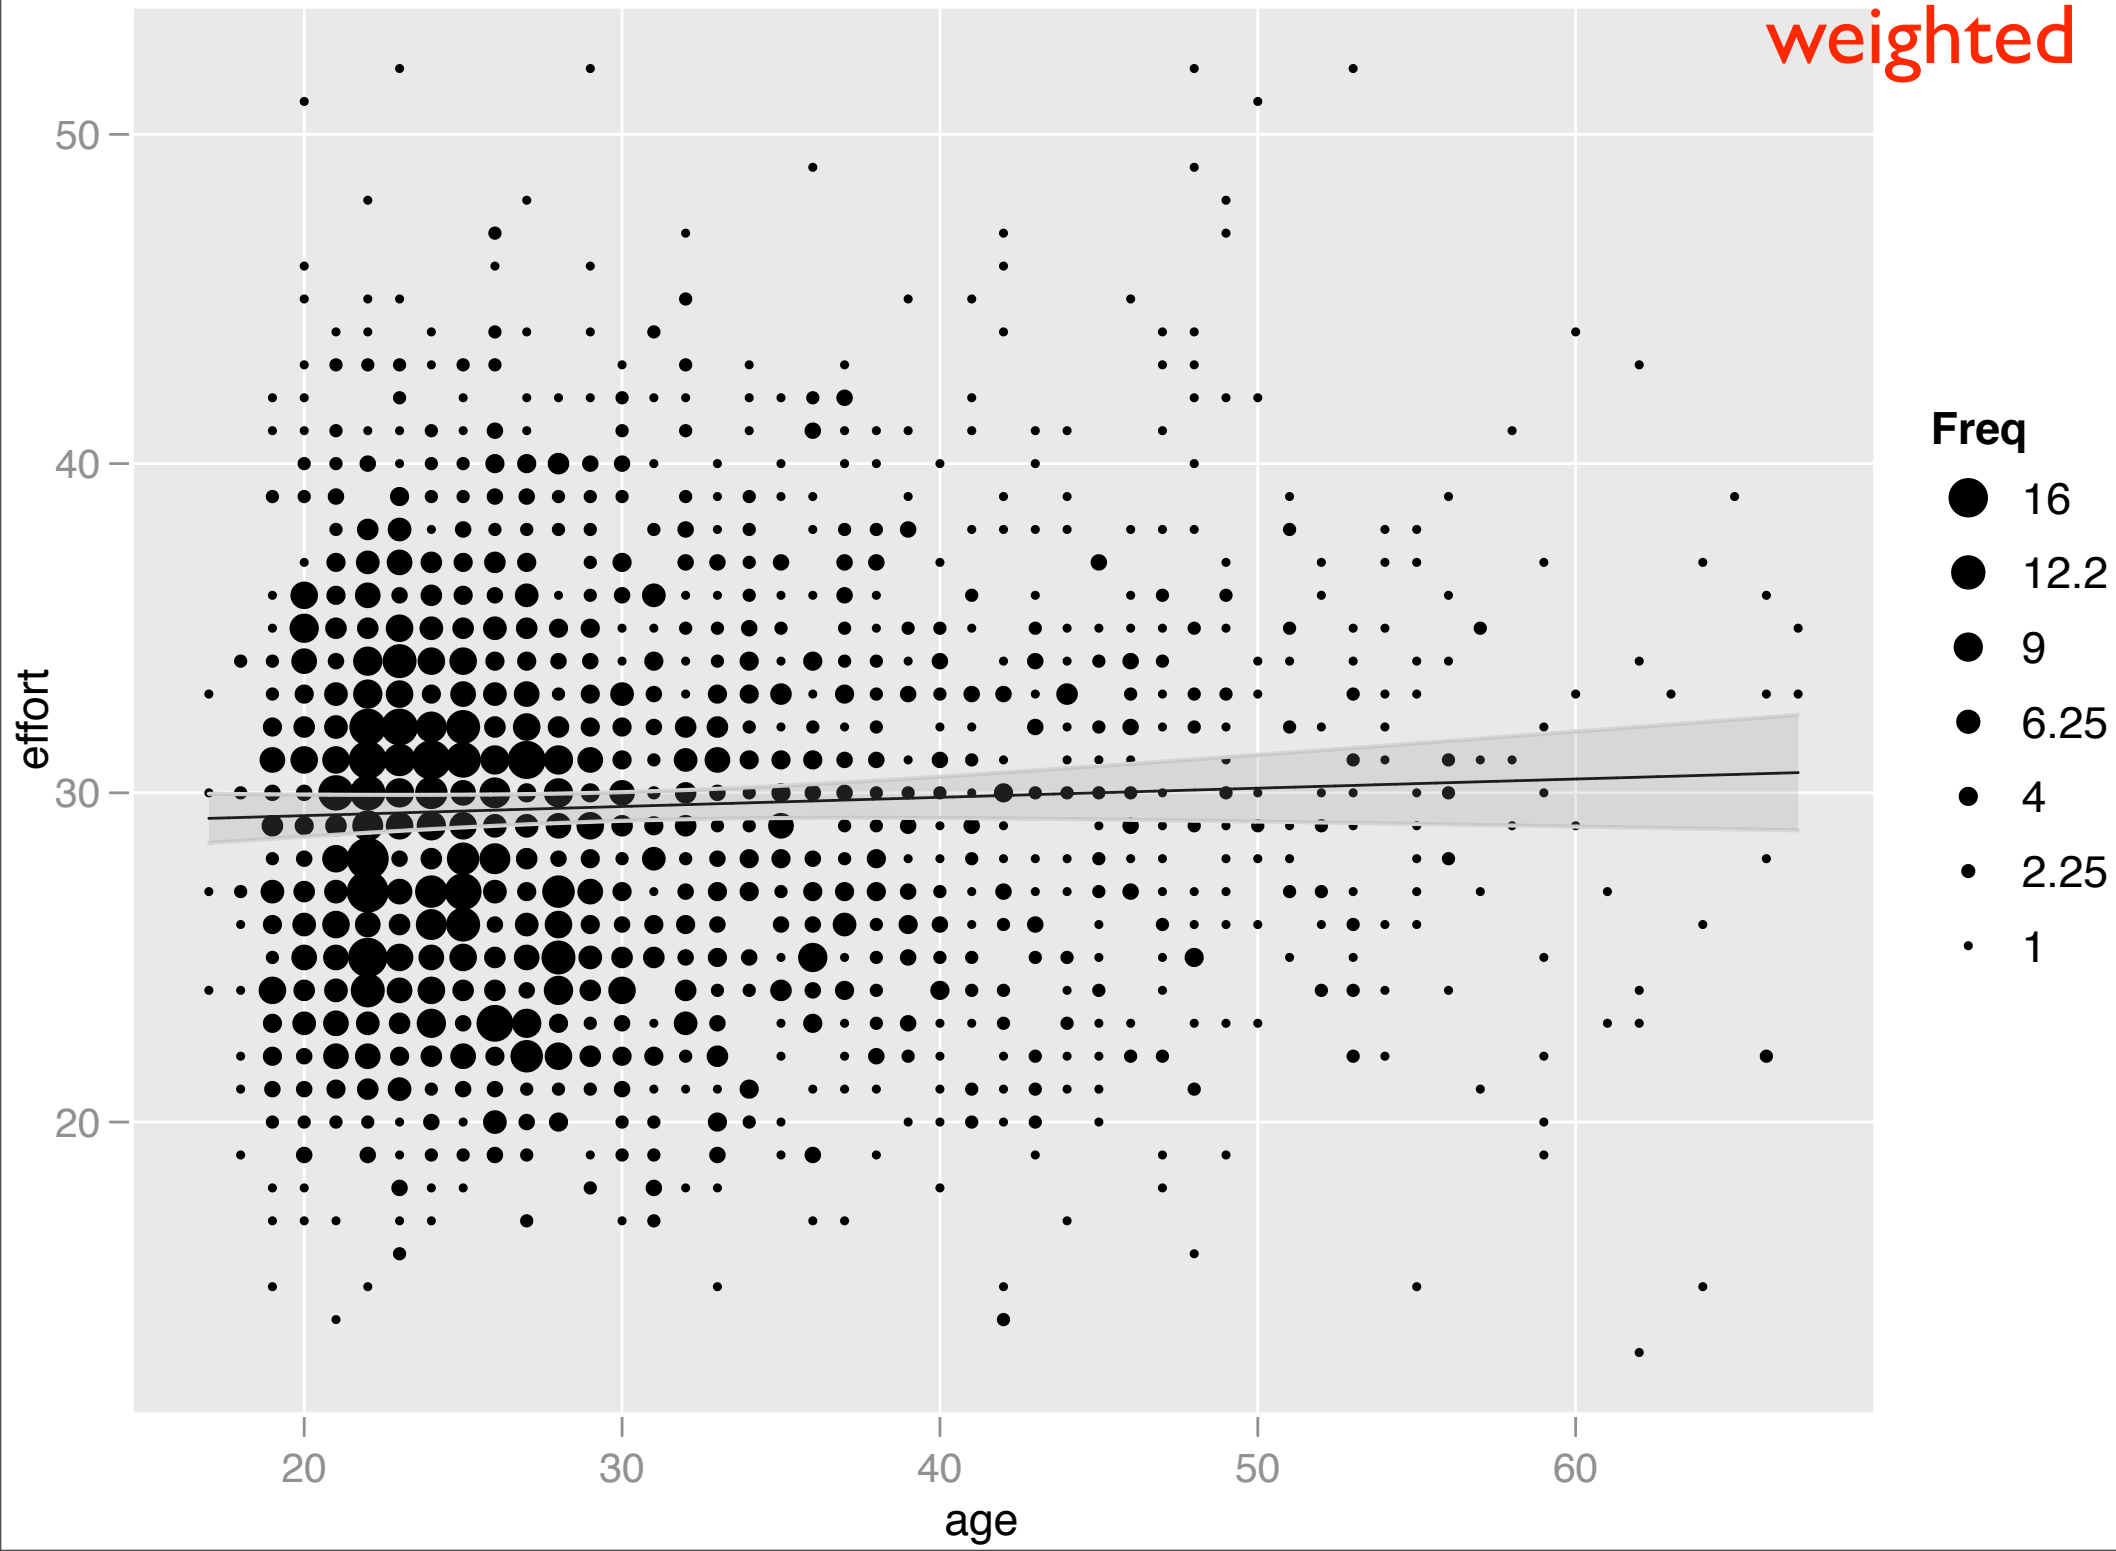

unweighted

weighted

# Bars vs points

- For statistical graphics:
  - Use bars for sums
  - Use points otherwise
- Bars must always start at zero

# Grades

- Please double check your assignment grades
- Leaving for Switzerland on Sunday - so get any missing assignments to me ASAP
- Will try and get final grades done (just) before I leave
